Risk Levels	Little to None		Minor		Moderate		Major	Extreme

Weather Key Points

Regional Operations Center

Western Region

Wednesday, August 10

- Monsoonal moisture will continue to bring showers and thunderstorms across the southern mountains and desert and the central Sierra.
 - Some storms may produce locally heavy rain across the southern desert and mountains, but there are no major burn scar concerns through Thursday.
 - The Apple/El Dorado burn scars may become a concern again on Friday and Saturday with increased moisture shifting further westward across southern California
- Locally elevated fire weather conditions continue across southern and central California with continued warm and locally breezy conditions, especially closer to the mountains and foothills.
 - Locally critical fire weather conditions are expected across far northern California, including the McKinney Fire, through Wednesday.
- Minor heat risk impacts are expected across the state, with areas of moderate heat risk across the southern desert areas.
- Minor coastal flooding possible at southern California beaches due to high astronomical tides and southerly swells.

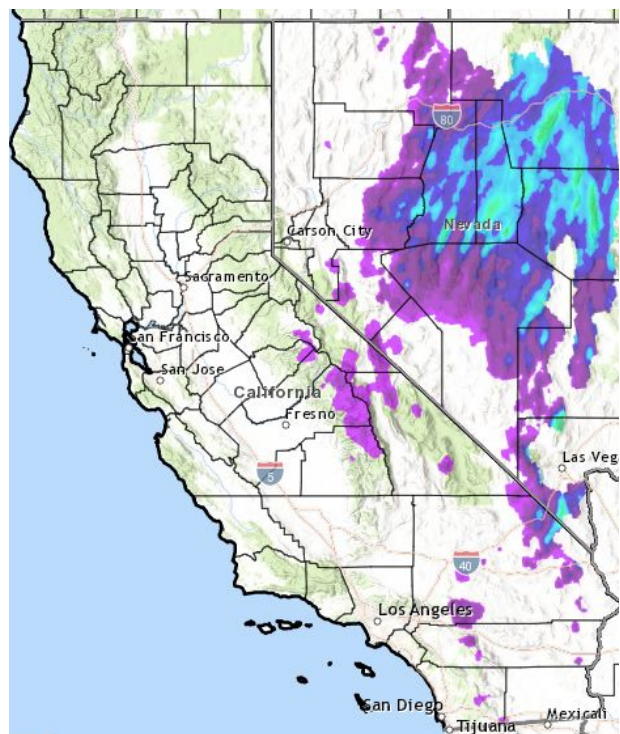

Precipitation Forecast

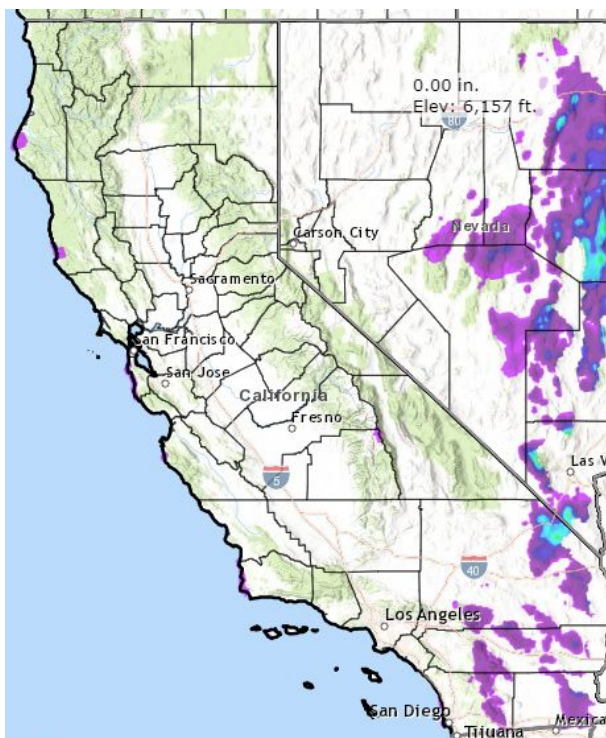

Regional Operations Center

Western Region

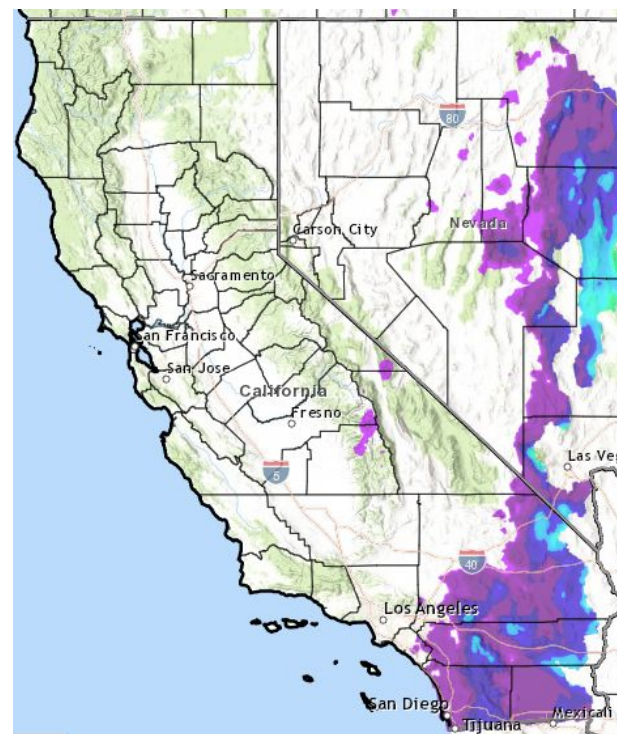

Wednesday, August 10

Wednesday

Thursday

Friday

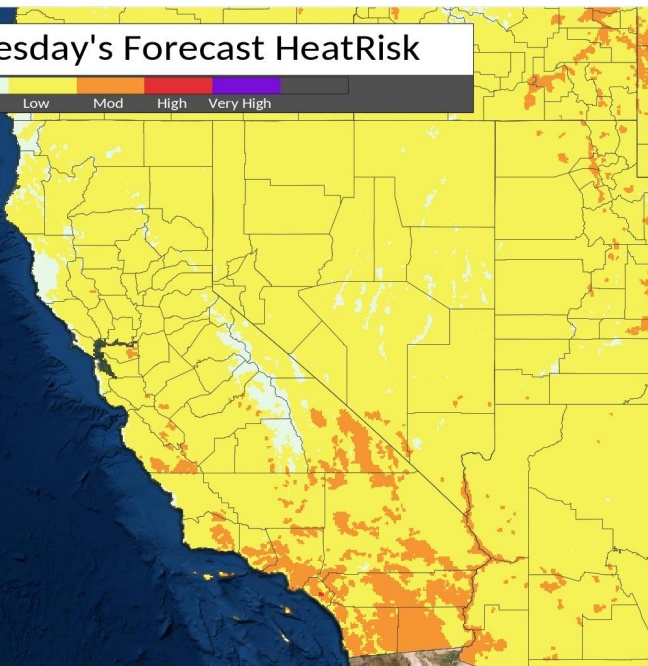

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

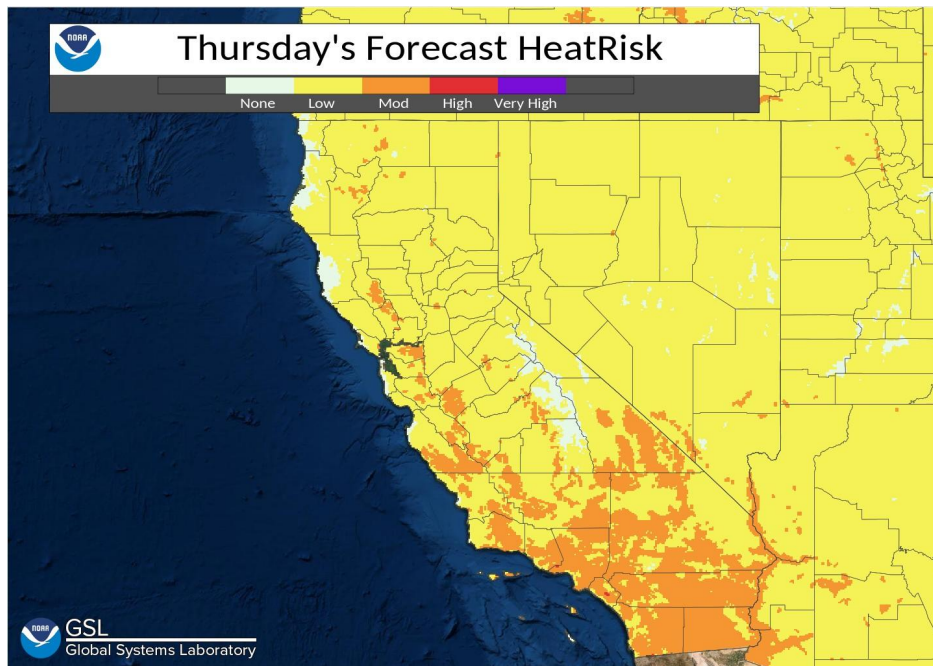

Wednesday's Forecast HeatRisk

None Low Mod High Very High

Thursday's Forecast HeatRisk

None Low Mod High Very High

Green	Level 0	No Elevated Risk
Yellow	Level 1	Low Risk for those extremely sensitive to heat, especially those without effective cooling and/or adequate hydration
Orange	Level 2	Moderate Risk for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration

Red	Level 3	High Risk for much of the population, especially those who are heat sensitive and those without effective cooling and/or adequate hydration
Magenta	Level 4	Very High Risk for the entire population due to long duration heat, with little to no relief overnight

Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Wednesday, August 10

6-10 Day Outlook (August 15 – August 19)

Temperatures

- Near normal temperatures are favored across far southeastern California, otherwise above normal temperatures favored across much of the state

Precipitation

- Above normal precipitation is favored over the southern half of the state, with near normal precipitation favored for the northern half of California.

8-14 Day Outlook (August 17 – August 23)

Temperatures

- Above normal temperatures are favored statewide

Precipitation

- Above normal precipitation is favored over the southern half of the state, with near normal precipitation favored for the northern half of California.

Risk Assessment Matrix

Regional Operations Center

Western Region

Wednesday, August 10

Impact Level Definition

- 1. Impactful weather is not expected.**
- 2. Potential threat to lives and property if no/incorrect actions are taken.**
 - Localized impacts on commerce possible.
 - Includes events that occur frequently.
- 3. Potential threat to lives and property if no/incorrect actions are taken.**
 - Impacts on commerce possible.
 - Includes events that occur a few times per year.
- 4. Actions likely needed to save lives and/or property.**
 - Significant impacts to commerce possible.
 - Includes events that occur infrequently.
- 5. Actions required to save lives and/or property.**
 - Significant and extended impacts to commerce.
 - Includes exceptionally rare events.
